

HONEY KOKANE

Amravati, Maharashtra, India | 7558450981 | honeykokane2008@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

SUMMARY

Frontend-focused developer building responsive React UIs and REST API integrations, with hands-on experience creating dashboards and data-driven interfaces. Built JanVaani, an AI-powered civic platform using the Gemini API with Recharts dashboards and Leaflet mapping, for a national hackathon, and currently building BookFlow, a multi-tenant SaaS booking platform with Razorpay and WhatsApp API integrations. Comfortable across the stack with Node.js, Express.js, and MongoDB, with growing familiarity with TypeScript. Delivered a freelance client website end-to-end and contributed to an open-source project.

SKILLS

Languages: JavaScript, TypeScript (basic), HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, React Router, Context API, Tailwind CSS

APIs & Backend: REST APIs & JSON, Node.js, Express.js, MongoDB, Mongoose, Auth.js (NextAuth v5)

Tools & Platforms: Git, GitHub, Vite, Vercel, MongoDB Atlas

EXPERIENCE

Freelance Web Developer — Dental Clinic Website

Jan 2026 (2 Weeks)

- Delivered a complete client website from requirements to deployment.
- Built responsive layouts, sticky navigation, hamburger menu, testimonial slider, and appointment booking form.
- Refined UI interactions based on client feedback.

PROJECTS

JanVaani — AI Civic Complaint Platform (Hackathon) [Live Demo](#) | [GitHub](#)

- Built a multilingual Next.js platform for citizen complaint aggregation, integrating the Gemini API over REST for priority scoring and near-duplicate clustering, and parsing/rendering JSON responses in the UI.
- Built a Leaflet-based hotspot map and Recharts dashboards for constituency development planning — reusable, data-driven dashboard components for operational reporting.

BookFlow — Multi-Tenant SaaS Booking Platform

- Building a multi-tenant booking and client management platform for Indian local service businesses using Next.js (App Router), MongoDB/Mongoose, and Auth.js v5.
- Designed role-based access (admin, business owner, client) and double-booking prevention via compound MongoDB indexes.
- Integrating Razorpay for webhook-verified payments and Twilio REST APIs for WhatsApp booking notifications.

MHT CET (Government Website) UI Upgrade [Live Demo](#) | [GitHub](#)

- Redesigned the Maharashtra State CET Cell examination portal UI with React, Vite, and Tailwind CSS for improved usability.
- Built reusable components, responsive layouts, and data-driven rendering.

Spotify Clone [Live Demo](#) | [GitHub](#)

- Built a responsive Spotify-inspired music player with live search and playback controls.
- Resolved 17 UI and JavaScript issues.

Restaurant Website [Live Demo](#) | [GitHub](#)

- Built a fully responsive restaurant website across four breakpoints with a custom hamburger navigation menu.

Todo List App

- Built using React, Redux Toolkit, and Tailwind CSS with full CRUD operations and immutable state updates.

Soterios (Open Source Contribution)

- Added two CSS themes and contributed through GitHub pull requests.

EDUCATION

B.Tech in Artificial Intelligence & Data Science

Prof. Ram Meghe Institute of Technology and Research, Badnera — Amravati | Commencing 2026

Higher Secondary Certificate (HSC)

Maharashtra State Board | Completed 2026
