SUMMARY

Frontend-focused full-stack developer (React, Next.js, Node.js, MongoDB) who builds responsive, data-driven web apps and API integrations. Built JanVaani, an AI-powered civic platform using the Gemini API, Recharts and Leaflet, for a national hackathon, and currently building BookFlow, a multi-tenant SaaS booking platform with Razorpay payments and WhatsApp notifications. Delivered a freelance client website end-to-end and contributed to an open-source project.

SKILLS

Languages: JavaScript, TypeScript (basic), HTML5, CSS3

Frontend: React.js, Next.js (App Router), Redux Toolkit, React Router, Context API, Tailwind CSS, Responsive Design

Backend & Databases: Node.js, Express.js, REST APIs, MongoDB, Mongoose, Auth.js (NextAuth v5)

Integrations & Libraries: Gemini API, Razorpay, Twilio (WhatsApp), Recharts, Leaflet

Tools & Deployment: Git, GitHub, Vite, Vercel, Netlify, MongoDB Atlas

EXPERIENCE

Freelance Web Developer — Dental Clinic Website

Jan 2026 (2 weeks)

- Delivered a complete responsive website for a dental clinic, from requirements gathering to deployment.
- Built sticky navigation, hamburger menu, testimonial slider, and an appointment booking form.
- Iterated on UI interactions based on client feedback.

PROJECTS

JanVaani — AI Civic Complaint Platform (National Hackathon) [Live Demo](#) | [GitHub](#)

- Built a multilingual Next.js platform for citizen complaint aggregation; integrated the Gemini API over REST for priority scoring and near-duplicate clustering, rendering the JSON responses in the UI.
- Built a Leaflet hotspot map and reusable Recharts dashboard components for constituency development planning.

BookFlow — Multi-Tenant SaaS Booking Platform (In Progress)

- Building a booking and client management platform for Indian local service businesses using Next.js (App Router), MongoDB/Mongoose, and Auth.js v5.
- Designed role-based access (admin, business owner, client) and prevented double bookings with compound MongoDB indexes.
- Integrating Razorpay with webhook-verified payments and Twilio REST APIs for WhatsApp booking notifications.

MHT CET (Government Website) UI Upgrade [Live Demo](#) | [GitHub](#)

- Redesigned the Maharashtra State CET Cell examination portal UI with React, Vite, and Tailwind CSS to improve usability.
- Built reusable components, responsive layouts, and data-driven rendering.

Personal Portfolio Website [Live Demo](#) | [GitHub](#)

- Designed and built a responsive portfolio showcasing projects, skills, and experience; deployed on Vercel.

Morrow Café — Offer Landing Page (Internship Assessment) [Live Demo](#) | [GitHub](#)

- Built and deployed a responsive landing page for a café in Noida with a ₹150-off offer claim flow.

ADDITIONAL PROJECTS

- **Spotify Clone** (HTML, CSS, JavaScript) — responsive music player with live search and playback controls; resolved 17 UI and JavaScript issues. [Live](#) | [GitHub](#)
- **Restaurant Website** — fully responsive across four breakpoints with a custom hamburger menu. [Live](#) | [GitHub](#)
- **Todo List App** (React, Redux Toolkit, Tailwind CSS) — full CRUD with immutable state updates.
- **Soterios (Open Source)** — added two CSS themes and contributed through GitHub pull requests.

EDUCATION

B.Tech in Artificial Intelligence & Data Science | 2026 - 2030 (Expected)

Prof. Ram Meghe Institute of Technology and Research, Badnera — Amravati

Higher Secondary Certificate (HSC) | Completed 2026

Maharashtra State Board
